Plytix Branding

Defining our look, feel, and style.
So every experience feels unmistakably ours.

Logo

Our mark originates from the first letter of our name and is formed by three elements that reflect our core pillars: product, culture, and values.

The icon's main expression features a rectangular frame, which should be used by default to maintain consistency and recognisability. A secondary, unframed (transparent) version of the icon is available for situations where the framed version is not suitable, but it should be treated as an alternative rather than the primary choice.

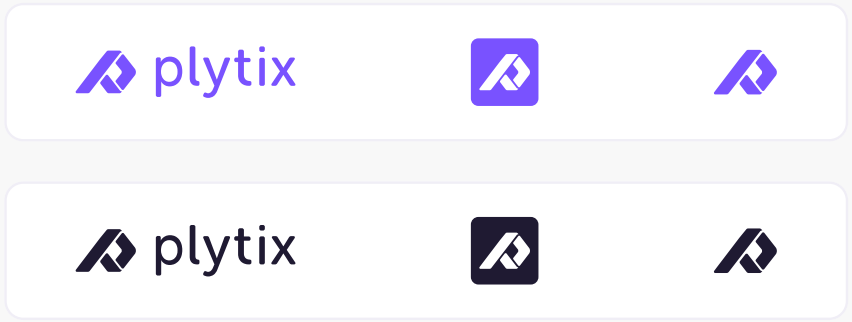
Minimum size

16px height

Logo usage

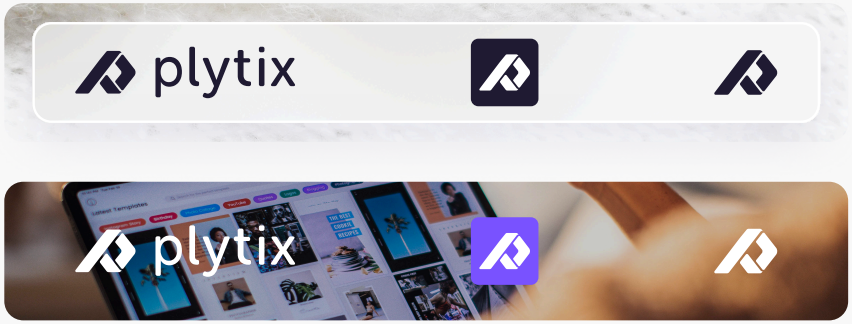
Here's a visual guideline of all our logo use-cases and how to correctly represent our branding in different backgrounds.

Over plain colors



Over images

It's recommended to to avoid placing our logo directly over pictures. Instead, place the content and logo inside a frame that shows our glass style and blur.



Colors

Our colour system is built around a foundation of neutral tones, anchored by a bright purple as the primary statement colour. Supporting this are two complementary purple shades and an extended range of greys, which provide flexibility and balance across applications. Yellow and blue are reserved as accent colours and may be introduced sparingly to add emphasis or visual contrast when needed.

Primary colors

Black (Grey 500)	#201A32 CMYK: 92, 73, 29, 89
White	#FFFFFF CMYK: 0, 0, 0, 0
Purple Main	#7A52FF CMYK: 52, 68, 0, 0
Background White	#F8F8F8 CMYK: 0, 0, 0, 3

Secondary Colors

Purple Medium	#BDA8FF CMYK: 39, 43, 0, 0
Purple Light	#EFEBFF CMYK: 11, 9, 0, 0

Accent

Blue	#47C6FF CMYK: 72, 22, 0, 0
Yellow	#E5A800 CMYK: 0, 18, 92, 0

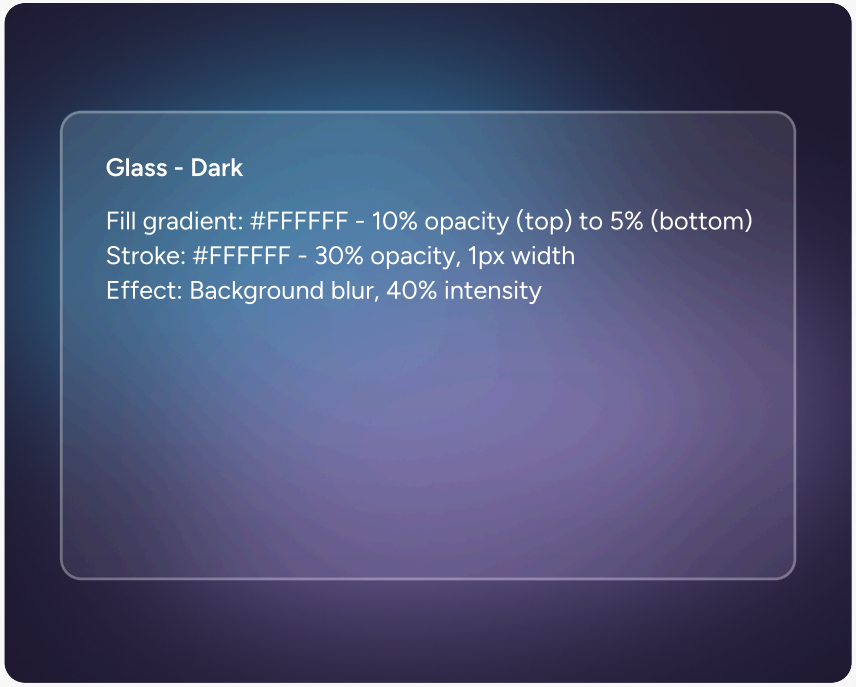
Grey Scale

Grey 400 #77708C CMYK: 15, 20,0, 45	Grey 300 #B9B3CC CMYK: 9, 12,0, 20	Grey 200 #F0EEF6 CMYK: 2, 3,0, 4	Grey 100 #FBFAFF CMYK: 2, 2,0, 0

Glass style

Our glass style is a visual resource that solves two issues: visual diversity, and readability.

There are two versions of our glass style, that varies depending on the background image or color of the design.
The glass style brings together several design attributes, all developed using Figma's tools to ensure consistency and precision across the system.



Glass - Light

Fill gradient: #FFFFFF - 10% opacity (top) to 5% (bottom)
Stroke: #FFFFFF - 100% opacity, 1px width
Effect - Background blur, 40% intensity
Effect - Drop shadow:

- Color #B9B3CC
- Position: X=0, Y=5
- Blur: 20
- Opacity: 30%

Exceptional use case
The main purple can be used as a shadow color to create a "wow" effect. Use sparingly and only on specific, intentional elements. Avoid overuse.

Fonts

Typography is fundamental to how our brand is perceived. Using our typeface consistently ensures a clear, unified visual identity across all touchpoints.

We use one typeface across the brand, relying on its range of weights to address different typographic needs.

Figtree

ABCDEFGHIJKLMNOPQRSTUVWXYZ

Bold - used in uppercase for pretitle style

abcdefghijklmnopqrstuvwxyz

Semibold - used as main bold style, and in titles H1-H3

abcdefghijklmnopqrstuvwxyz

Medium - used in H4 title

abcdefghijklmnopqrstuvwxyz

Regular - used as regular paragraph style

Figtree, Semibold, 9.5px

P bold italic - Lorem ipsum dolor sit amet

Figtree, Semibold italic, 9.5px

Notes - Lorem ipsum dolor sit amet

Figtree, Medium, 7.5px

Co-branding guidelines

Download the .ai file from the folder below to create a co-branded logo. This requires Adobe Illustrator.

Do not co-brand with the Plytix logo in any way other than the “X” unifier.
